ZEYNEP OZDEMIR

Junior Software Engineer | Frontend & Full-Stack
Calgary, AB (open to Canada and US) | barikazeynep2@gmail.com | (587) 664-6405
linkedin.com/in/zeynep-ozdemir-yyc/ | github.com/zeynep-ozdemir1905 | https://zeynepportfoy.vercel.app/

Junior software engineer with a frontend and UI/UX foundation, building accessible, responsive products in React, Next.js, and TypeScript. Currently shipping AI chat interfaces and backend services in a product engineering role, collaborating cross-functionally with senior and product engineers. Owns projects end to end, from user research and Figma design through production deployment, and has built serverless AI agents with LLM APIs.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL (MySQL)
Frontend: React, Next.js, React Native (Expo), Tailwind CSS, Vite, Responsive Design, Accessibility (WCAG)
Backend & AI: Node.js, Serverless Functions (Vercel), Supabase, LLM APIs (Gemini), Resend
Design: Figma, UX Research, Prototyping, User Testing, Marketing
Tools & Practices: Git, GitHub, GitLab, Merge Requests and Code Review, Agile/Scrum, Debugging, Testing, Claude, Cursor

PROFESSIONAL EXPERIENCE

Junior Software Engineer (Product), Thrive Creative Ltd Sept 2026 – Present
Calgary, AB | Internship

- Build features for AI-powered products, including conversational chat interfaces and supporting backend services, using TypeScript, MySQL, and GraphQL, contributing to iterative production releases.
- Resolve defects flagged in GitLab merge requests, using Claude to speed up debugging and code review and keep merge requests moving through review.
- Document code architecture in written reports that help the team understand system structure and prioritize improvements.
- Clarify requirements, user flows, and edge cases with product engineers, and report bugs to senior engineers with clear, reproducible detail to align technical decisions with product goals.
- Collaborate with senior and product engineers on iterative releases, applying user-centered design to improve product usability.

Web Developer and Designer, Tech Connect Alberta June 2026 – July 2026
Calgary, AB | Contract / Summer Internship

- Sole designer and developer for startup clients, owning the full project lifecycle: client discovery, UX research, design, development, hosting, and handoff.
- Delivered responsive multi-page websites with JavaScript, TypeScript, Tailwind CSS, and Vite, deployed on Vercel with consistent rendering across devices.
- Translated client business goals into cohesive UI designs, managing communication and iterating on stakeholder feedback.

UI/UX Designer and Front-End Developer, Project90 UCalgary (Volunteer) July 2026 – Present
Calgary, AB

- Designed Figma prototypes and built reusable, accessible React components for a cross-platform health dashboard, using a data-driven architecture so new modules require no UI changes.
- Conducted UX research and analyzed user feedback to refine designs, improving usability and visual consistency across screens.

LEADERSHIP AND VOLUNTEERING

Marketing and Designer, Enactus SAIT June 2026 – Present

- Produced on-brand social media graphics and campaign assets in Canva and Figma to support recruitment and outreach, using AI tools to accelerate content production.

Social Media and Digital Marketing Manager, IDI Calgary 2022 – Present

- Manage Instagram, Facebook, YouTube, and the WordPress site; apply SEO improvements and monthly analytics reviews to guide content strategy and grow audience engagement.

Tech Connect Alberta Ambassador and Marketing

- Contributed to Tech Connect Alberta's marketing and social media, represented them in networking events.

PROJECTS

Real Estate AI Agent Lofty 2026

- Designed and prototyped a serverless AI agent that automates real estate lead and inquiry handling, giving agents faster first responses to prospects; deployed on Vercel.
- Integrated Gemini for conversation handling, Supabase for lead storage, and Resend for automated follow-up emails; authored a technical specification covering architecture, data flow, and APIs, demonstrating end-to-end AI solution development.

GoApricot Mobile App – Lead Designer and Developer 2026

- Led a team in designing and building a cross-platform mobile app in React Native (Expo), TypeScript, and Tailwind CSS, from concept to App Store-ready build.
- Validated the design with an interactive Figma prototype and user testing; established the team Git workflow and led pull request reviews to keep code quality consistent.

Firewatch – Hackathon 2026

- Co-built a wildfire risk prediction tool that estimates fire danger before ignition across Alberta, British Columbia, and Saskatchewan; contributed the business proposal and pitch.

LockIn AI – Hackathon, Community Choice Award 2026

- Built a gamified Chrome extension with a lockdown-style focus browser, timed study sessions, and distraction control to encourage sustained focus; completed sessions grow a virtual garden with a reactive companion. Won the Community Choice Award.

EDUCATION

Bachelor of Information Technology, Software Development, SAIT Calgary AB, Canada — Expected April 2028

Diploma, Information Technology, Software Development, SAIT Calgary AB, Canada — Completed April 2026
